

# Reverb Acts

A project by Inés García

Reverb Acts is:

A booklet that tells a story.

A history, several stories, or the same from different points of view.

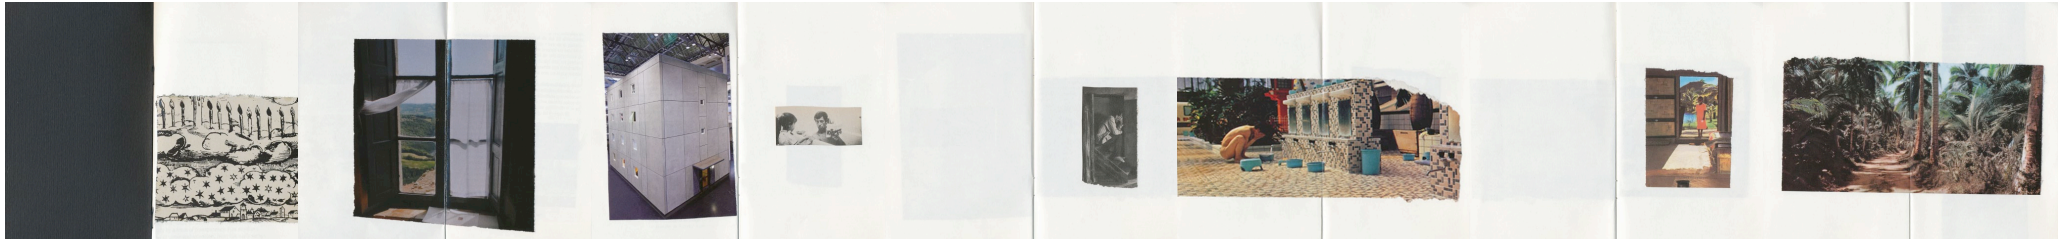

A mural that develops the psychology of a character.

A young girl, a woman, Marlene, Ingrid, Liz...

A video that is studying the gesture of an actress.

The tear duct of the eye, the pores of the skin, wrinkles on the forehead, the commissure of the lips.
