

**UNTITLED  
Project**

**CARLOS MACIÁ**

My intention will be to produce a new series. It lacks provisionally the title for being in an embryonic phase.

A series that continues with my previous pictorial work and that will try to make more radical and demonstrate some of the obsessions that pursue me.

It will treat of a series that plays with the limits of the own painting. That will have a forceful result that will turn between end of the industrial processes and the forms of the urban art.

A series that will try to rescue all that a priori lacks an artistic predetermined intention, of everything what transmits freshness and genuineness.

A series that will fluctuate in a slightly diffuse limit between painting and sculpture.

This Project will be financed by the Program of Artistic Production Matadero 2011.
